MOST RECENT EXPERIENCE

TheSquadMC – *Chief Executive Officer & Shareholder*

TheSquadMC is a brand that originates from three children Minecraft youtubers. This brand promotes, sells and operates products including Minecraft servers, youtube creator management, mobile games and merchandise stores.

January 2018 – October 2018

- Decreased dependencies on public software by over 75% in under three months
- Created and maintained a very unique and in depth network management system and core utility that is used across all physical server machines
- Owned and operated a network that supported nearly 400k unique users a month
- Managed major critical assets which included financials, marketing tools and codebases

Independent Professional – *Manager to YouTube Content Creators*

Responsible for management of each of the creators time, financials, media content, conflict resolution, social media accounts, sponsorships, employees and overall brand status.

May 2015 – October 2018

- Managed a wide range of children's content creators for the Youtube Platform
- Helped secure brand deals with large companies for each creator
- Ensured that day to day operations for each creator was smooth
- Ensured that each creators brand and channel was never tarnished and that each creators brand was protected to the extreme

FrozenOrb – *Senior Software Engineer*

FrozenOrb is a technology-focused software development and talent management company.

November 2017 – February 2018

- Helped create a secure custom proxy software to support a new innovative client side anticheat software called CheatBreaker that was used by over 100k users with simultaneous peeks nearing 35k
- Worked with the client team in ensuring secure & efficient communication between the client and the proxy
- Utilized Machine Learning to analyze data sets provided by clients to better locate and punish users attempting to utilize cheats

Murder Mystery Remastered – *Chief Executive Officer & Founder*

Murder Mystery Remastered was a custom take on the popular gamemode Murder Mystery remade in the popular game Roblox.

August 2017 – December 2017

- During open betas reached player counts of 150k concurrent players
- Wrote all software, handled all financials and marketing

PokeFind – *Frontend & Backend Software Engineer*

PokeFind is an exciting vanilla Minecraft server where players can find, catch, and battle Pokémon. The server features trainer levels, towns, gyms, trading, PokéMarts, and PokeStops.

April 2017 – September 2017

- Created & maintained a unique game that has been played by over 4 million users & helped boost network player count above 4k average
- Created & maintained a complex and in depth internal API library for the development and sysadmin team
- Created & maintained a lag free system of using thousands of resource heavy 3D objects simultaneously for multi-purpose use

Fred Meyers – *Night Freight Crew*

Fred Meyer, Inc., is a chain of hypermarket superstores founded in 1922 in Portland, Oregon, by Fred G. Meyer. It merged with Kroger in 1999, though the stores are still branded Fred Meyer.

September 2016 - April 2017

- Assisted other team members in restocking all shelves in the grocery department
- Helped properly sort over 2k pieces per delivery to the correct store location
